Devoted to the Household, the Fashions
and the activities
of Women.
MARY MARSHALL, Editor.
DAILY DEPARTMENT OF THE
WASHINGTON HERALD.
Correspondence is invited. Address
all communications to the Woman's
Editor of The Washington Herald.
MONDAY, MARCH 29, 1915.

Are You Big and Industrious?

Physically large and willing to work? Very well, Madame, your husband will be true and he will not desert you. That's what holds the men, according to a recent investigation carried on by the Chicago bureau of public welfare for the purpose of determining the causes of desertion. It is whether a woman is strong and healthy and ready to pitch in and do her share of the work. And these results are in the nature of a surprise to some of us. We had rather thought that there were other qualities, qualities of charm and tact, of youth and fascination, of vivacity and coquetry that kept a man interested enough in his wife to remain faithful to her all his life.

And the reason, come out in black and white that it is the big, husky wife who has the husband's love of all that prevents his desertion. It is the woman who is healthy and therefore happy. The woman who can work, who can rise before the morning and cook for her husband and children, who can wash and iron and mend and who can do a good deal of housework in twenty-four hours.

As for the further disappointing, it is certainly not at all remarkable that a man who comes to his wife and finds her as big and industrious as he is, that he will not desert her. It is something that most women can accomplish for themselves. They cannot, unfortunately, tell us so, but they can be strong enough to be good workers. And of course all women cannot be big and strong. Some women are naturally big and strong. Some of them are not. But it is not the woman who is big and strong who is the one who is the most successful in her home. It is the woman who is big and strong who is the one who is the most successful in her home. It is the woman who is big and strong who is the one who is the most successful in her home.

HOROSCOPE.

The stars indicate, but do not compel.
Monday, March 29, 1915.

In the morning of this day conditions are not favorable for most business and financial operations. The Sun is in the sign of Cancer.

Young folk should be especially careful in their conduct. They should not get into bad company and get a bad name.

There is a great deal of talk about the future of the world. It is a very interesting subject. It is one that everyone should know something about.

Put Potatoes in Bread if You Want to Cut Expenses

Assistant Secretary of Agriculture Says that Housewives Can Do Their Own Flour Mixing with Potatoes, Corn, Flour or Rice.

That the American housewife is herself capable of doing all the flour mixing desirable is the commentary of Assistant Secretary of Agriculture Vrooman on the mooted mixed flour question. He says, further, that the American housewife could materially reduce the cost of living if she were to get the flour mixing habit.

"There are some thirty substitutes that can be mixed with wheat flour in making bread," he said in a statement issued here today. "Many of these are more nutritious than wheat flour, some of them are cheaper than wheat flour, and of these two or three at least, are commonly available almost anywhere."

"Potatoes, corn flour and rice flour, in various proportions, can be mixed with wheat flour," he said. "In making bread, the use of these substitutes is not only a saving, but it is also a healthful one. The use of these substitutes is not only a saving, but it is also a healthful one. The use of these substitutes is not only a saving, but it is also a healthful one."

"Potatoes have a special advantage in this regard, since potato flour can be made without the use of any other ingredients," he said. "It is a very nutritious and healthful substitute for wheat flour. It is a very nutritious and healthful substitute for wheat flour. It is a very nutritious and healthful substitute for wheat flour."

"The use of these substitutes is not only a saving, but it is also a healthful one. The use of these substitutes is not only a saving, but it is also a healthful one. The use of these substitutes is not only a saving, but it is also a healthful one."

"The use of these substitutes is not only a saving, but it is also a healthful one. The use of these substitutes is not only a saving, but it is also a healthful one. The use of these substitutes is not only a saving, but it is also a healthful one."

"The use of these substitutes is not only a saving, but it is also a healthful one. The use of these substitutes is not only a saving, but it is also a healthful one. The use of these substitutes is not only a saving, but it is also a healthful one."

"The use of these substitutes is not only a saving, but it is also a healthful one. The use of these substitutes is not only a saving, but it is also a healthful one. The use of these substitutes is not only a saving, but it is also a healthful one."

"The use of these substitutes is not only a saving, but it is also a healthful one. The use of these substitutes is not only a saving, but it is also a healthful one. The use of these substitutes is not only a saving, but it is also a healthful one."

"The use of these substitutes is not only a saving, but it is also a healthful one. The use of these substitutes is not only a saving, but it is also a healthful one. The use of these substitutes is not only a saving, but it is also a healthful one."

SOCIETY WOMEN TAKE TEN-MILE WALKS IN NEW FAD AT NEWPORT

MRS. ROLAND DICKSON

Along the seashore of Newport, Rhode Island, a group of women were seen walking in the early morning hours, dressed in a walking costume and wearing sensible built shoes. They were walking in the early morning hours, dressed in a walking costume and wearing sensible built shoes.

The women walkers were the proper thing to do in the early morning hours. They were walking in the early morning hours, dressed in a walking costume and wearing sensible built shoes.

HOUSE-WIVES DAILY ECONOMY CALENDAR

HOW TO COLOR EASTER EGGS.

It is said that our feudal ancestors used to pay part of their rent in eggs, which were due on Easter morning. If you were a landlord you always had eggs aplenty on Easter day and the only thing to do was to eat them. What would these medieval lords have said if this tribute of eggs had come in in the shape of blue, yellow and variegated specimens?

It's not such an easy matter, this egg dyeing, either, and if you don't mind the directions strictly you are apt to make a bad business of it. Most egg dyes nowadays are absolutely harmless, and you should take pains to see that it is this sort of coloring material that you are buying. The task of blowing out the eggs before dyeing is a great bother and wasteful, as you are quite apt to spoil some of your eggs in the process.

The best method is to dye the eggs just before breakfast, or before you want to serve them. If the dye is all ready and you have read over the directions beforehand, you need allow only ten or fifteen minutes for the task. Have the dye ready in old tea-cups—green, light blue, orange, red, purple, pink, yellow and scarlet. If you have a bowl of cold water, the desired degree of hardness and then quickly drop them from the boiling water into the cold water, and as soon as they have cooled, remove them from the dye and place in the dish from which they are to be served. If you possess one of these delightful brooding-bird dishes, serve the colored eggs in it, or stretch a point and buy one of these little dishes to delight the younger members of your family. If you do not care to do this, arrange a nest of lettuce leaves, crisp, white leaves that delight the eye as well as the taste.

Many people who do not care for eggs for breakfast have an egg supper on Easter day. This simplifies the coloring process, and the eggs are quite as acceptable for supper as are hot eggs. For these you can make use of the delectable and delicious recipe made for this purpose. The egg should be cool or cold and the butter should be placed as smoothly as possible on the egg. Smooth the butter with a damp cloth and then remove the paper, leaving the imprint of the design on the face of the egg. Add to the variety, dye some of the eggs in light shades and then, after they have been cooled, add the delectable design. With a paint brush you can easily add the variety of the design. Using some of the egg dyes as you would water colors, paint the names of the various members of the family in contrasting colors on some of the eggs. This can either be done in hot eggs or to cool eggs. (Copyright, 1915.)

At this party the hostess must have as many egg dyes and tea sets as possible, for it adds to the reality of the moment. Each girl is given half a dozen eggs and half a dozen tea sets. Using some of the egg dyes as you would water colors, paint the names of the various members of the family in contrasting colors on some of the eggs.
